OGDEN CITY

SHOWING a population of Thirty-six Thousand, Three Hundred and Forty Eight (36,348)—a comfortable and progressive increase of 1213 over the compilation of 1917, the information in this, the 1918 issue of the Ogden City Directory, indicates the continued development of Ogden and suburbs at a rapid and substantial pace.

Never in any twelve months of its history has the general business, commercial development and increase in capacity of factories been so great. Ogden has gradually developed into the chief food manufacturing center between the Missouri River and the coast. Ogden receives the products of the farm, orchard and range from the hands of the producer; however, only a small per cent is passed on in the raw or unfinished condition; for example, Ogden buys grain; but it sells cereal foods, macaroni and malt. The quality of Ogden's manufactured products continues to be the highest.

An additional unit in the meat packing industry was added during the past year when the Union Stock Yards of Ogden were completed and opened, adjoining the Ogden Packing & Provision Company plant. The latter company made further expansions while work was started during the year on a new live stock feed mill and feeding station with capacity of 10,000 cattle and 25,000 sheep. Additional meat packing branch plants were opened during the year in two Pacific coast cities and two eastern cities, while export shipments were started to Canada, England and France.

Every other line of Ogden Manufacture shows similar increased capacity: Canneries, Cereal Food Plant, Evaporating and Pickle plants have been increased from 25% to 100% in capacity. The sugar industry has more than doubled: Besides great increase in the capacity of each plant, new factories have been built until Ogden capital now operates twelve sugar factories. Tin can factory, candy factories, bottling works, honey, salt, garment and knitting factories have all exceeded the output of any former year. The Ogden Iron Works, with increased capacity, now manufactures sugar machinery for the many factories building in the Intermountain region.

Ogden's great wholesale houses have not only kept the pace, but have continually spurred factory, furnace and farm to greater industrial activity.

Civic development has perhaps led in the march in improvements. New public institutions, schools and churches have been built, and existing structures improved. City water, sewer and sidewalk systems have been greatly extended, and, as a climax, several miles of asphaltum pavement have been completed.

The number of names shown in this directory is 17,105 which, multiplied by 2⅛ as the average family attached to each name, indicates the total population of 36,348.

Respectfully submitted,

R. L. POLK & CO.

NON-SKID CONCRETE PAVEMENTS FOR CITY STREETS

VAN BUREN AVE., OGDEN CITY

PERMANENT CONCRETE ROADS

are a war necessity. They save time and labor in hauling produce from the farms to railway terminals or markets. They save wear and tear on truck, tires and engines, on horses and carts—waste in fuel, oil and power—speeds up production. Fewer men, fewer motors, less fuel, less trouble, less expense for repairs needed—more work done.

No more stalled trucks in mud, ruts or holes. Trucks can run the entire year with full loads all the time.

Conservative first cost — upkeep is negligible. Made of home materials.

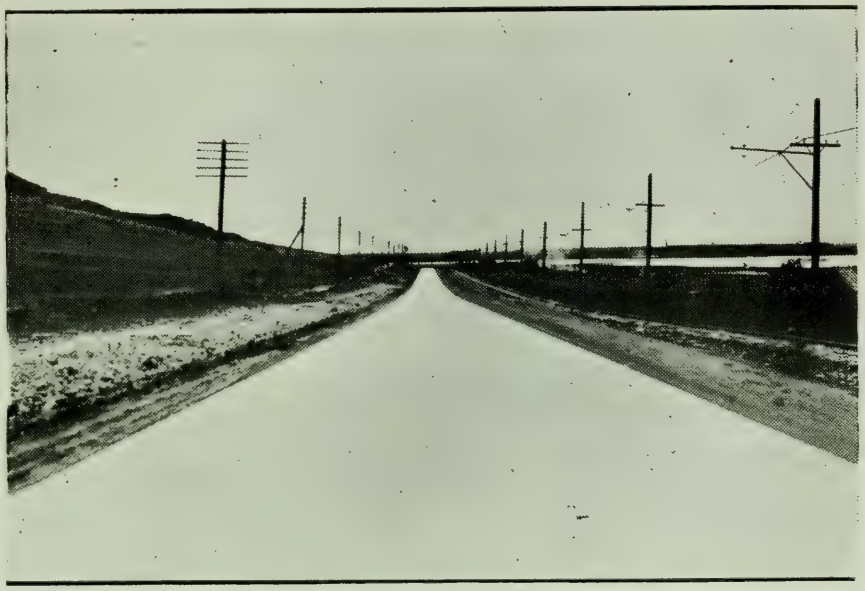
CONCRETE ROADS FOR PERMANENT ROADS



CONCRETE ROAD BETWEEN SALT LAKE AND OGDEN

PERMANENT CONCRETE ROADS

are a war necessity. They save time and labor in hauling produce from the farms to railway terminals or markets. They save wear and tear on truck, tires and engines, on horses and carts—waste in fuel, oil and power—speeds up production. Fewer men, fewer motors, less fuel, less trouble, less expense for repairs needed—more work done.

No more stalled trucks in mud, ruts or holes. Trucks can run the entire year with full loads all the time.

Conservative first cost — upkeep is negligible. Made of home materials.

The National Real Estate Journal

¶ The National Real Estate Journal has created a decided stir in real estate circles. It has been widely read, widely quoted and widely talked about by real estate men everywhere.

¶ It has, by virtue of being the official organ of the National Association of Real Estate Exchanges, assumed its position of leadership in the real estate field, and is rapidly establishing its reputation for progressiveness and for filling its pages with the best, most interesting, entertaining and valuable information pertaining to the real estate profession.

¶ The National Real Estate Journal is a real estate institution. If you read it this year, you will want it next year, and the year after.

¶ The subscription price is $1.00 for the year—for 12 big, hearty, helpful numbers. Better send your dollar right now.

"Made in Utah"

Should be the Brand of all Printed Matter Used in Utah Business.

The Printing Industry of Utah is One of Great Dimension—It affords Employment for Many Wage-Earners, who are the "Spenders" of Commerce.

Don't Send Your Printing out of the State—that's a disgrace—If Ogden can't do it, try Salt Lake.

Are You a Member

OF THE

Manufacturers Association of Utah?

Inquiries are often made by manufacturers, not members of this association, as to what added value would accrue to them through their joining the association.

Frankly, they would gain little above what they are already receiving. For this reason: When this association works for measures calculated to benefit the State's industries every manufacturer be he member or not, is benefited.

When adverse, unjust legislation is throttled and constructive measures made effective the benefits are general. When labor difficulties are solved by the committees of this association, no employer of labor on a big scale, escapes the benefits.

When time and money and energy are spent for the education of the public to a consistent use of Utah made goods, every producer in every mill, factory and workshop is benefited.

So that membership in this association does not add to the benefits in that direction.

But, there is a moral aspect to membership, which no manufacturer can afford to ignore.

All these activities require means, real U. S. coin. It should come from the beneficiaries of such wide spread operations.

The sense of justice suggests that such financial responsibility be equitably distributed among the manufacturers of the State; that no one of them should feel himself exempt.

To hold out the ready hand for acceptance of benefits and favors, without the willingness to recompense for such gratuities, smacks strongly of the unpopular parasite, that exists on the vitality of foreign bodies, to which it attaches itself and grows fat. It takes all, gives nothing in return.

BE CONSISTENT—BE LOYAL—CO-OPERATE WITH THIS ASSOCIATION
